Dark Mode

Dark mode is a theme where all UI elements are darkened.

When to use

Dark mode is recommended when you are in a dark environment as it prevents eye strain.

Dark mode is great for highlighting important content

It works similarly to turning off the lights in a movie theater.

When to use
Design Principles
Color

Design Principles

Comfort of content

Avoid using highly contrasting colors or content in dark mode. Continuous use will bring fatigue.

Consistency of Information

The information content in the dark mode needs to be consistent with the light mode, and the initialization hierarchical relationship should not be broken.

Color

In the application of colors, we are based on 12 sets of basic swatches and combine longer rule processing to make colors better blend under different environmental colors.

Color Palette

Dust Red / 薄暮

斗志、奔放

Volcano / 火山

醒目、澎湃

Sunset Orange / 日暮

温暖、快

red-1	#2a1215	volcano-1	#2b1611	orange-1	#2b1d11
red-2	#431418	volcano-2	#441d12	orange-2	#442a11

green-10	#d5f2bb	cyan-10	#b2f1e8	blue-10	#b7e3f3

Color Palette Generator

Additionally, we also provide a set of tools for generating color palettes in dark colors. You need to select your primary color and the background color of the page. We will generate a dark mode color palette for you.

color-1	color-2	color-3	color-4	color-5	color-6	color-7	color-8	color-9	color-10

Colors ↗

Ant Design interprets the color system into two levels: a system-level color system and a product-level color system.

The system-level color system mainly defines the basic color palette, neutral color palette and data visualization color palette in the design of Ant Financial. The product-level color system is in the specific design process, based on the color of the system to further define the tone of the product in accordance with the requirements and function of the color.

Color Model

Ant Design's design team preferred to design with the HSB color model, which makes it easier for designers to have a clear psychological expectation of color when adjusting colors, as well as facilitate communication in teams.

System-level Color System

Ant Design system-level color system also comes from the "natural" design language. Designers abstract the natural scenes through the capture, combined with the technical gene of Ant Financial, forming a unique 12 colors. Further through a large number of observations, to capture the different colors of natural light under the law of change, with the art of drawing ideas, the 12 colors were derived. The definition of neutral color palette is balanced with readability, aesthetics and usability.

Base Color Palettes

Ant Design's base color palette totals 120 colors, including 12 primary colors and their derivative colors. These colors can basically include the need for color in background applications design.

Dust Red / 薄暮		Volcano / 火山		Sunset Orange / 日暮	
斗志、奔放		醒目、澎湃		温暖、快	
red-1	#ff1f10	volcano-1	#ffd2e8	orange-1	#fff7e6
red-2	#ffcc7	volcano-2	#ffd8bf	orange-2	#ffe7ba
red-3	#ffa39e	volcano-3	#ffb96	orange-3	#ffd591
red-4	#ff7275	volcano-4	#ff9c6e	orange-4	#ffc069

Polar Green / 极光绿		Cyan / 明青		Daybreak Blue / 拂晓蓝	
健康、新		希望、强		包容、科技、普惠	
green-1	#f6ffed	cyan-1	#e6ffb	blue-1	#e6f7ff
green-2	#d9f7be	cyan-2	#b5ff5ec	blue-2	#bae7ff
green-3	#b7eb8f	cyan-3	#87e8de	blue-3	#91d5ff
green-4	#95de64	cyan-4	#5cd6d3	blue-4	#69c0ff
green-5	#73d13d	cyan-5	#36fcf9	blue-5	#40a9ff
green-6	#52c41a	cyan-6	#13c2c2	blue-6	#1890ff
green-7	#389e0d	cyan-7	#08979c	blue-7	#096dd9
green-8	#237804	cyan-8	#006d75	blue-8	#0050b3
green-9	#135200	cyan-9	#00474f	blue-9	#003a8c
green-10	#092b00	cyan-10	#002329	blue-10	#002766

Ant Design's color palette also has the ability to further extend. After careful elaboration by designers and programmers, we have come up with a set of color generation tools that combine the natural variation of colors. When there is a need for further color design, designers simply define the primary colors according to certain rules and will get a complete range of derived colors automatically.

Neutral Color Palette

gray-1	gray-2	gray-3	gray-4	gray-5	gray-6	gray-7	gray-8	gray-9	gray-10	gray-11	gray-12	gray-13
#ffffff	#fafafa	#f5f5f5	#f0f0f0	#d9d9d9	#bfbfbf	#8c8c8c	#595959	#434343	#262626	#1f1f1f	#141414	#000000

Programmatic Usage

We provide Less and JavaScript usage for developers.

Less

```
@import '~antd/lib/style/themes/default.less';
```

```
.selector {
  color: @blue-5;
  background-color: @gold-2;
}
```

JavaScript

```
npm install @ant-design/colors
```

```
import {blue} from '@ant-design/colors';
console.log(blue); // ['#E6F7FF', '#BAE7FF', '#91D5FF', '#69C0FF', '#40A9FF', '#1890FF', '#096DD9', '#0050B3', '#003A8C', '#002766']
```

More APIs: [@ant-design/colors](#)

Product-level Color System

Brand Color

The brand color is one of the most intuitive visual elements used that is used to embody product characteristics and communicate ideas. When selecting colors, it is important to understand how the brand color is used in the user interface. In the basic color palette to choose the main color, we recommend choosing the color plate from the shallow depth of the sixth color as the main color. Ant Design's brand color comes from blue of the base color palette, its Hex value is 1890FF, application scenarios include: key action point, the operation status, important information highlighting, graphics and other scenes.

Functional Color

Functional color represents a clear message as well as status, such as success, error, failure, reminder, link and so on. Functional color selection need to comply with the user's basic understanding of color. We suggest that the functional colors should be kept as consistent as possible under a set of product systems. Do not have too much customization to interfere with the user's cognitive experience. Ant Design's functional color palette is shown on the right:

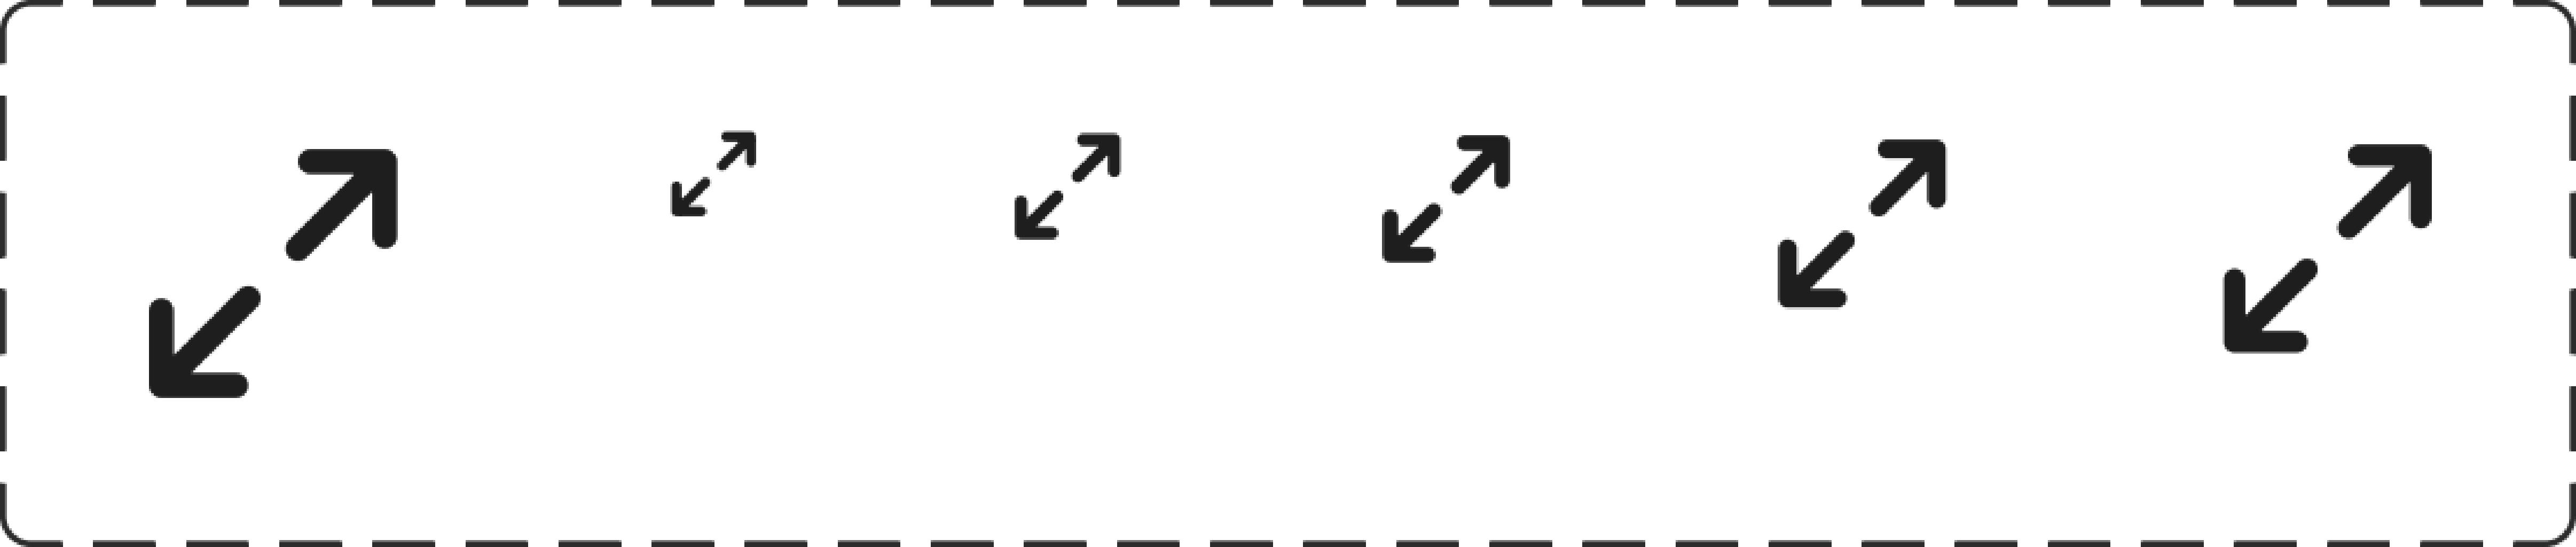

Neutral Color

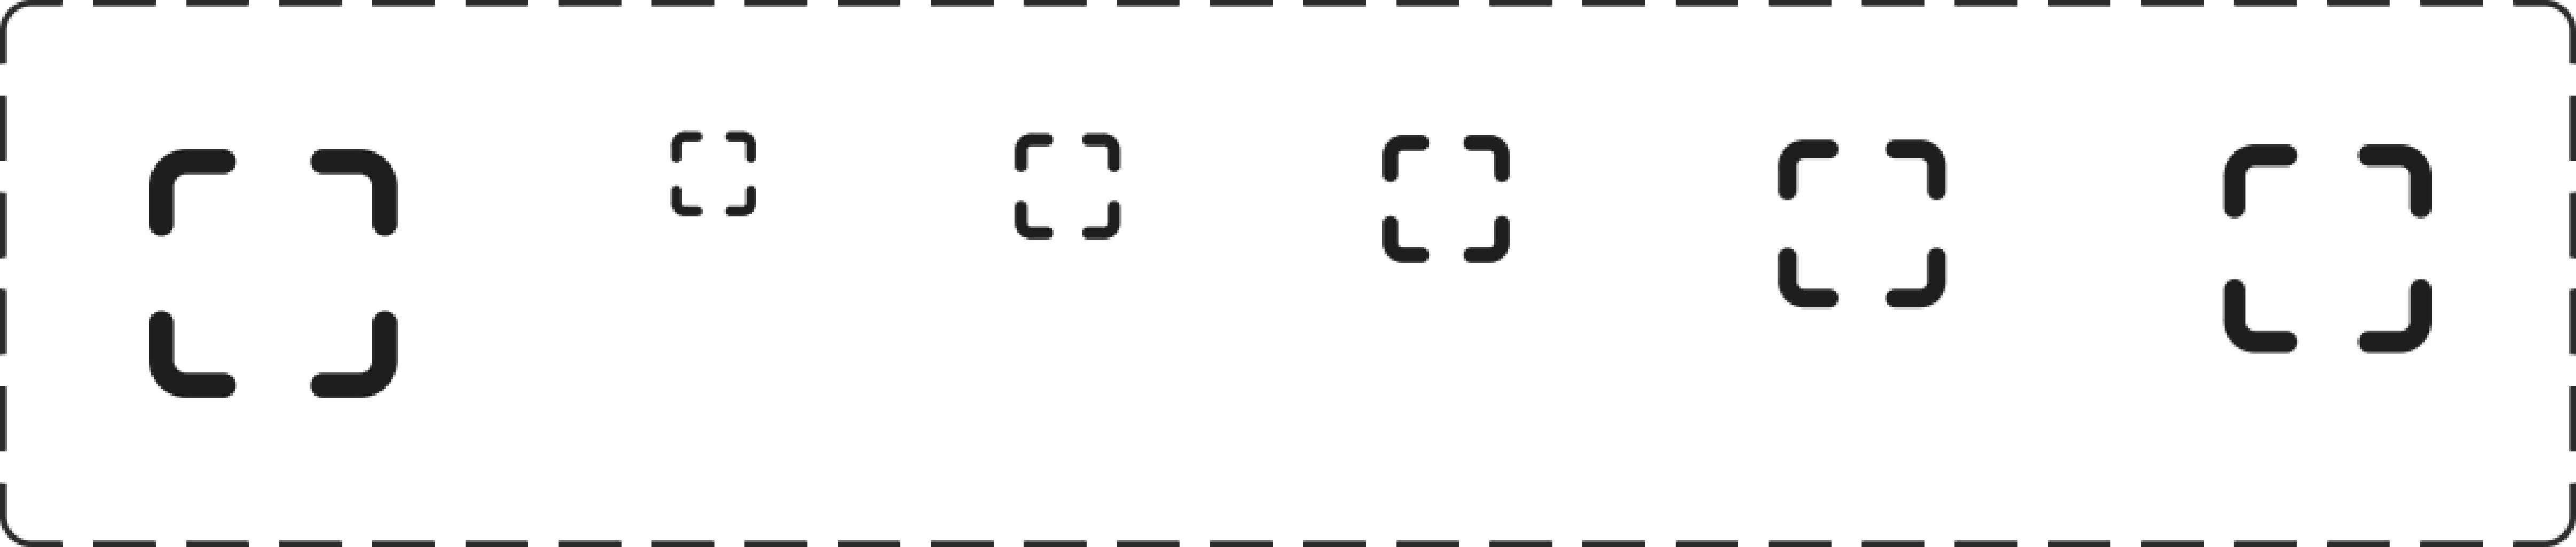

Neutral color is mainly used in a large part of the text interface, in addition to the background, borders, dividing lines, and other scenes are also very common. Neutral color definition needs to consider the difference between dark background and light background, while incorporating the WCAG 2.0 standard. The neutral color of Ant Design is based on transparency, as shown on the right:

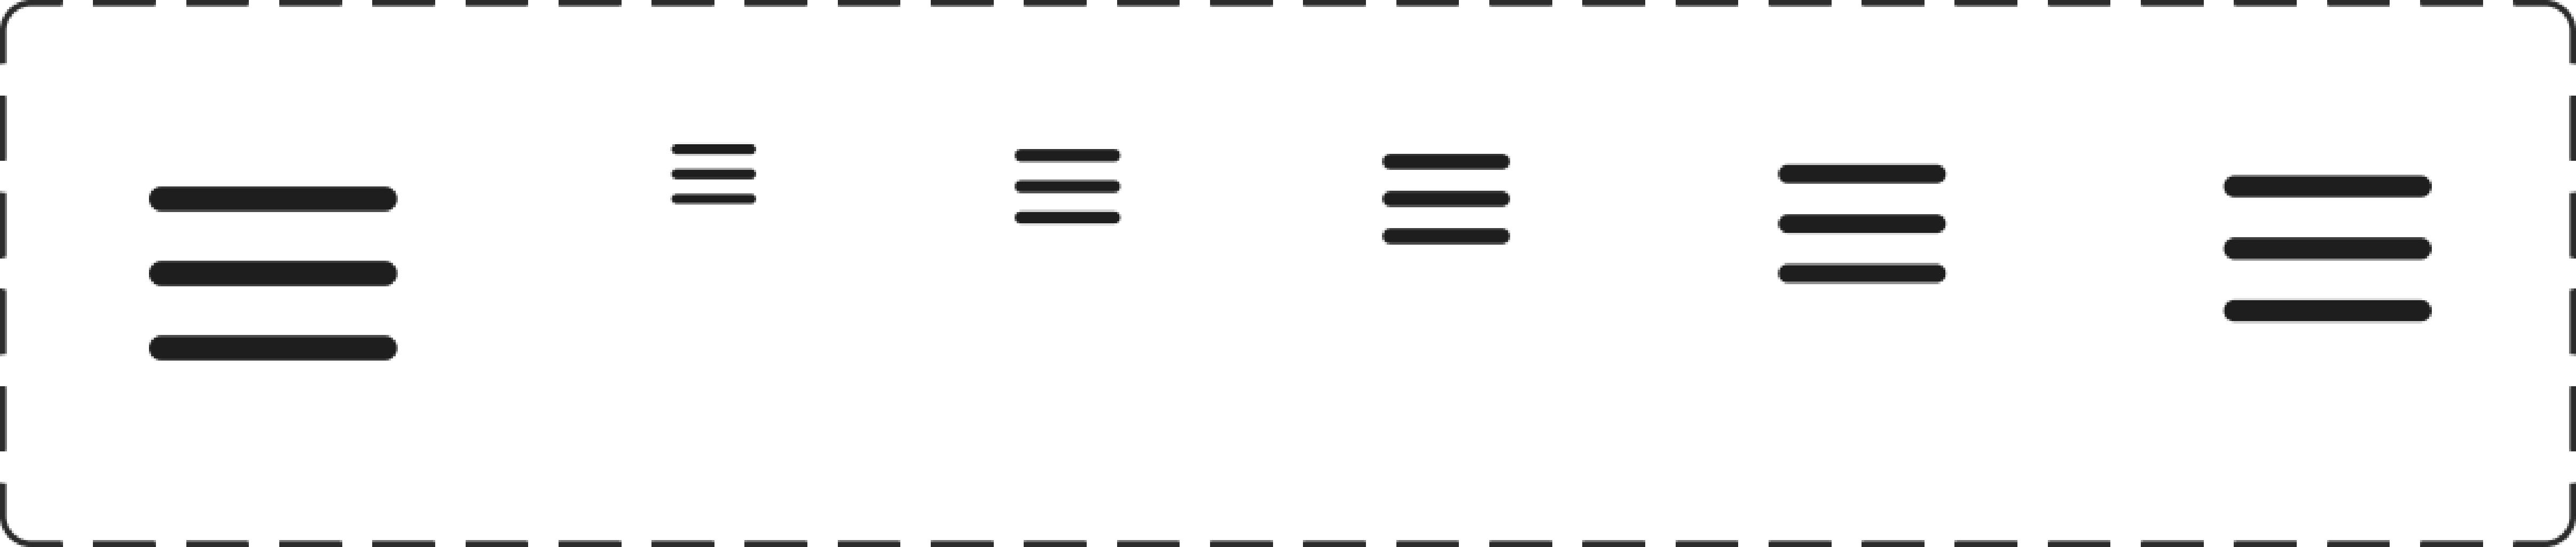

Color Application In Enterprise Product Design

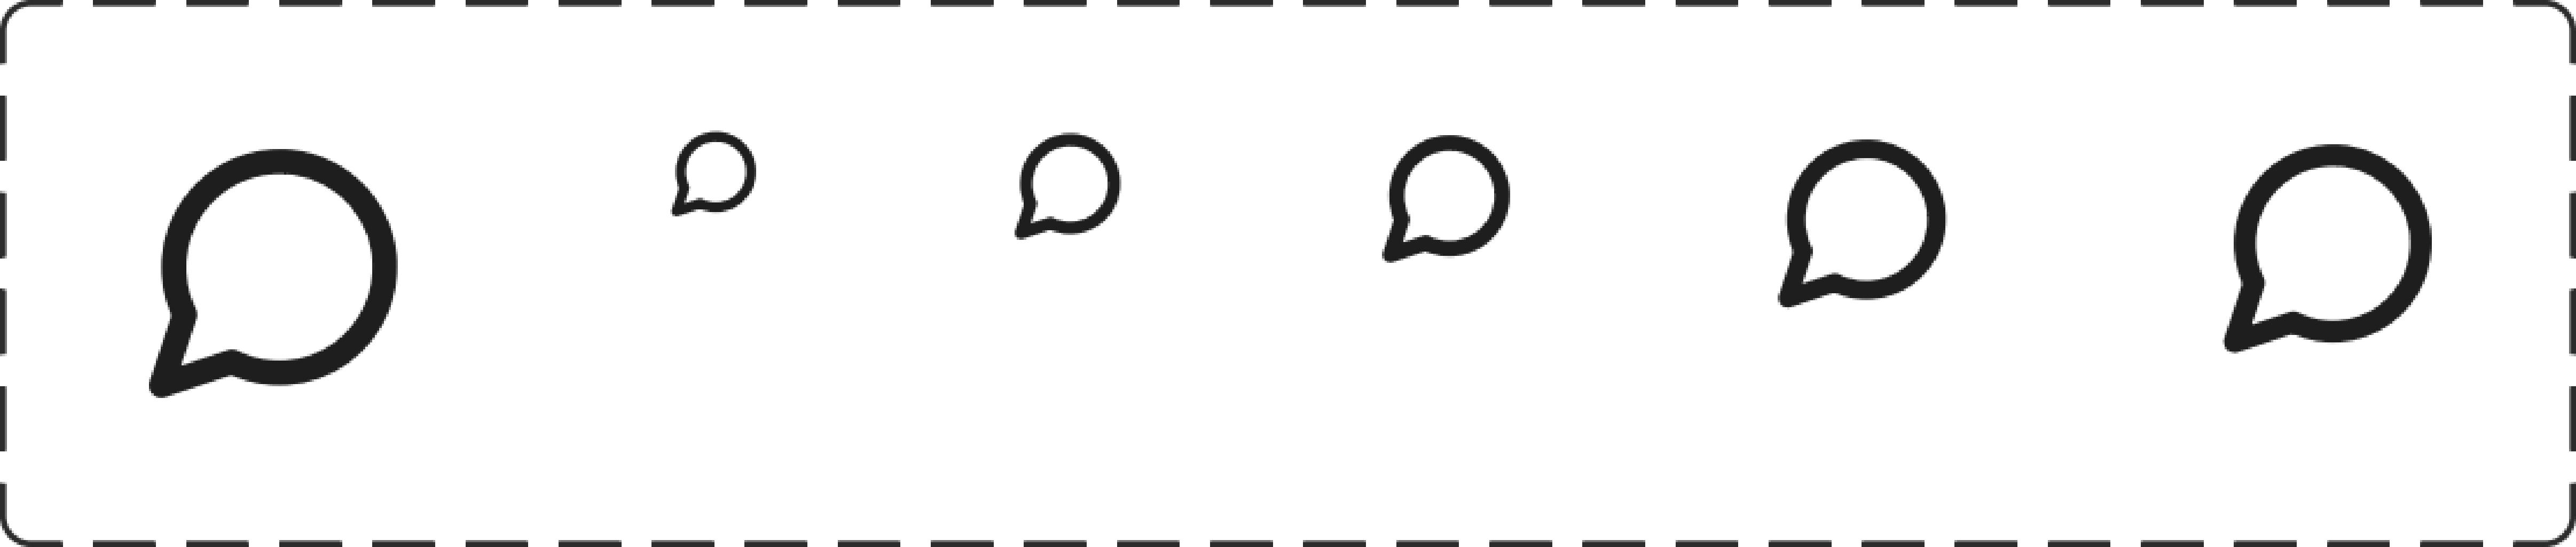

In the design of background applications of Ant Financial, our attitude towards color is restrained. Color is used more based on information delivery, operational guidance and interactive feedback purposes. Above these principles that do not undermine operational efficiency and affect the clear communication of information, a rational choice of color is key. Of course, with illustrations and display page can be properly broken this idea.
